● CONCEPT 1 - ANGELED SPACES

IDEA

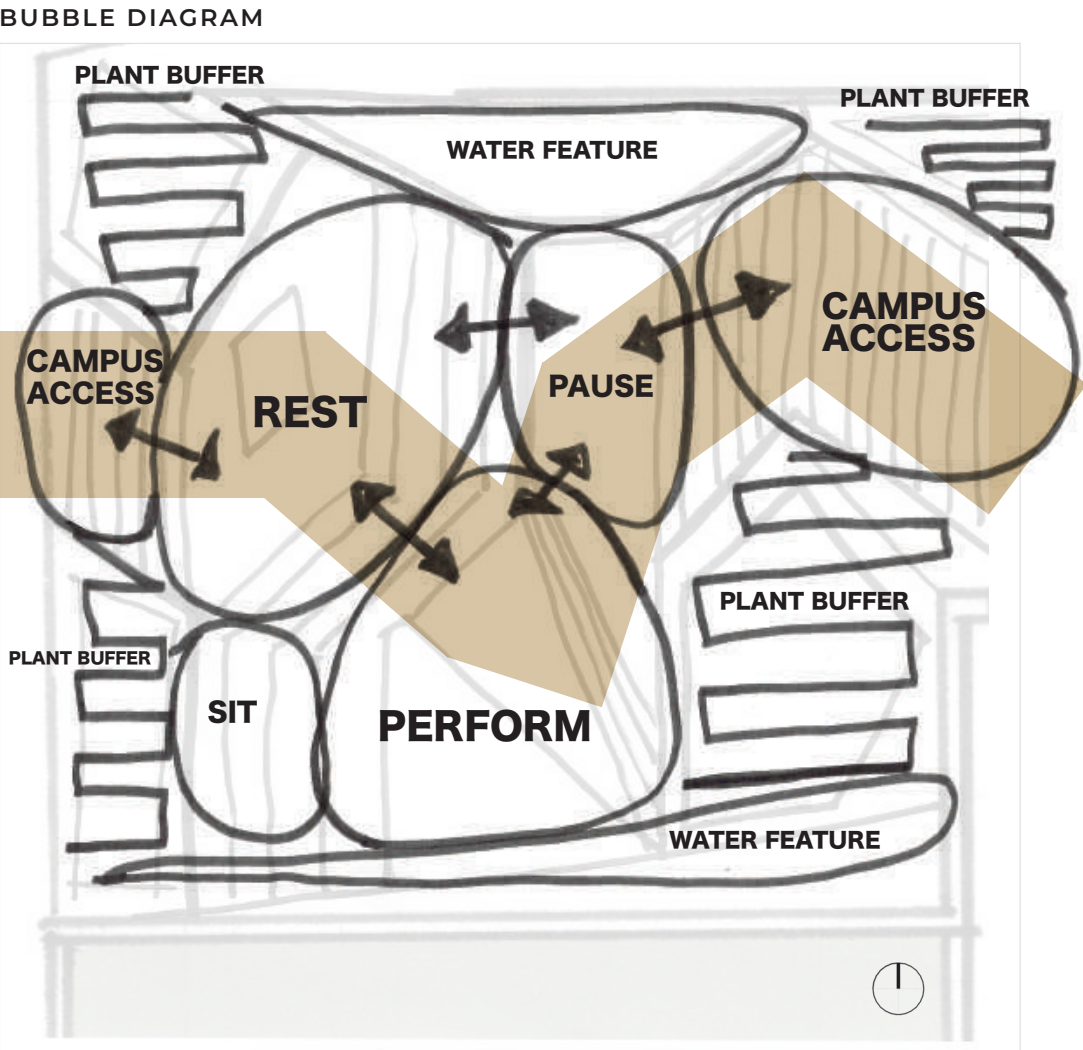

This concept organizes the site into multi level terraces with multiple uses. The walls and supporting forms are all angled to create an enveloping space. There is a transitional performance and gathering area, in addition to ample seating and views of this space. Two flanking water features parallel each other.

CONCEPT 2 - STAIRS AND SLOPES

IDEA

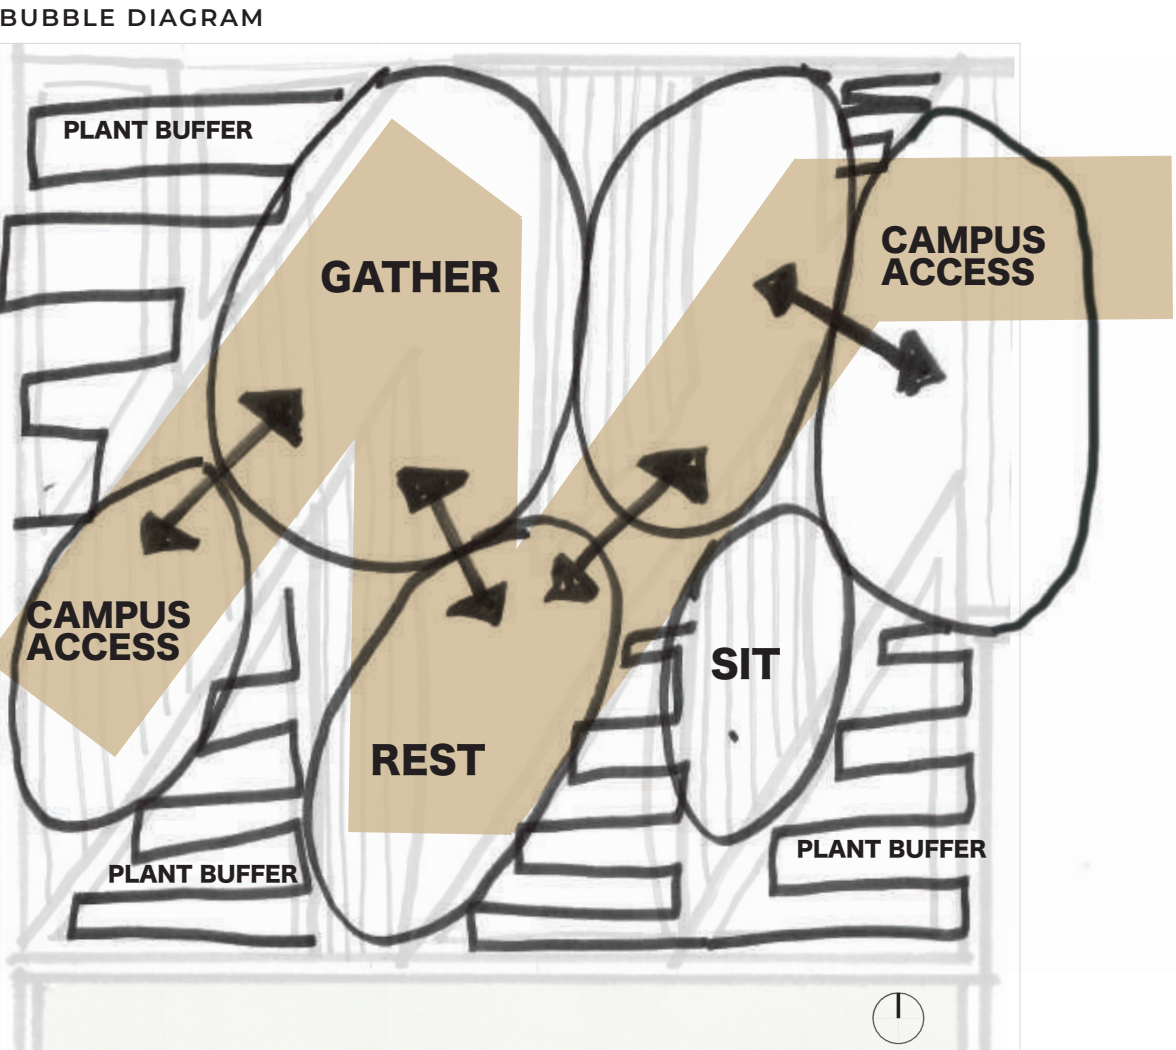

Inspired by the stepwells of India, this concept invites users to meander through the site location in zig-zag pathways. Each elevation/terrace will become a unique destination to gather, rest or study. Green spaces will flank the walkways and soften the space.

PART I

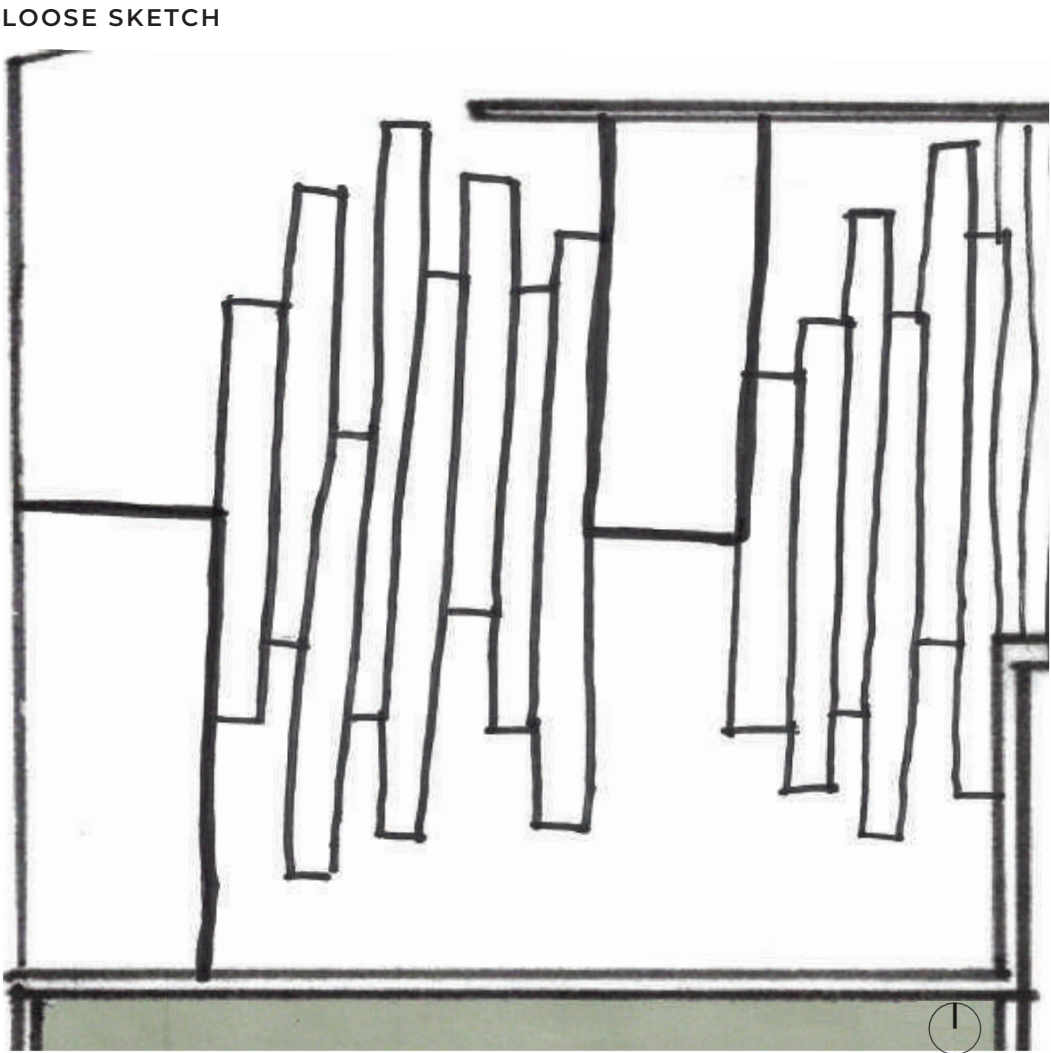

MELNITZ STAIRS REIMAGINED

CONCEPT 3 - STAGGERED SECTIONS

IDEA

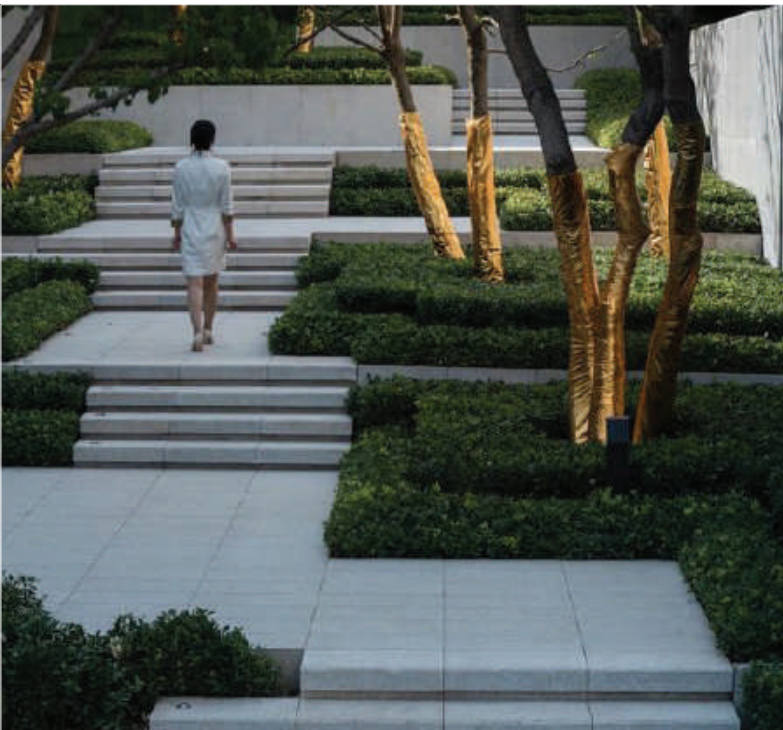

This concept is comprised of a staggered modern staircase that provides a direct route from Melnitz to Broad upper entrance. The opposing sides of the stair will feature a lush planting and many trees.
